

COOKIE POLICY

DIGI-WORK.COM SPRL registered with the Crossroads Bank for Enterprises in Belgium under the following number BE0471.866.891 and whose registered office is located at Avenue des Saisons 118 A, 1050 Ixelles (Belgium) uses small amounts of data stored on your computer, called "cookies", to collect information on how visitors use our website (hereinafter "the website").

In Belgium, the use of these technologies in the context of telecommunications is governed by the Belgian law of 13 June 2005 on electronic communications, as amended by the law of 10 July 2012 (transposition of the Telecom package).

1. WHAT IS A COOKIE?

Cookies are text files containing small amounts of information that are downloaded to your device when you visit a website. Cookies are then sent back to the original website on each subsequent visit, or to another website that recognizes the cookie. Cookies are useful because they allow a website to recognize a user's device.

Cookies allow you to navigate efficiently from page to page, remember your preferences and generally improve the user experience. They can also help to make the advertisements you see online more relevant to you and your interests.

Some cookies contain personal information - for example, if you click the "Remember Me" button when you log in, a cookie will store your username. Most cookies do not collect personally identifiable information, but rather more general information such as how users arrive at and use the site, or the general location of a user.

There are four main types of cookies:

- Session cookies last only for the duration of the session. They are deleted when the user closes the web browser.
- Persistent cookies remain even after the session is closed. They are stored on the user's hard drive until they expire (persistent cookies are set with expiration dates) or until the user deletes the cookie. Persistent cookies can be used to collect identifying information about the user, such as their web browsing behavior or preferences for a specific website.
- First party cookies belong to the site you have chosen to go to.
- Third party cookies come from a site whose content is retrieved indirectly, for example through an image tag or banner.

You can set your browser to reject some or all cookies.

Cookies allow DIGI-WORK to process data about your use of the Site ("usage data"). Usage data may include your IP address, geographic location, browser type and version, operating system, referral source, length of visit, page views and website navigation paths, as well as information about the timing, frequency and pattern of your service use depending on the type of Cookies we use.

For example, the source of the usage data is obtained through third party Google cookies. This information is then stored in Google Analytics. Data relating to marketing emails from DIGI-WORK, including your opening and clicking behavior, is collected and stored in MailChimp. This usage data may be processed for the purpose of analyzing the use of our website and services and to find ways to optimize your experience.

Please read the following explanation to understand which cookies we use for which purpose.

2. WHAT COOKIES DO WE USE?

Below is a list of the cookies used on the website:

- Technical cookies which are essential for good communication and are intended to facilitate navigation;

- Analysis and statistical analysis cookies (Google Analytics) which record information about your visit to the website, such as the domain name and host computer from which you are browsing the Internet, the date and time of your visit and the URLs from which you accessed the website.

In accordance with the Belgian law of 13 June 2005 on electronic communications as amended by the law of 10 July 2012 (transposition of the Telecom package), your consent is not required when the installation of a cookie is exclusively for the purpose of enabling or facilitating communication by electronic means or is strictly necessary for the provision of an online service at your express request (technical cookies, session cookies, performance cookies when strictly in place for their technical functionality).

These cookies can be set according to your choices, as described in the section below.

3. HOW TO CONTROL COOKIES?

It is possible to change the setting via the Help section of your browser toolbar.

Below is more information on the most common browser settings. All of them allow you to manage the cookies that are installed on your computer or device. You can block or allow these cookies or indicate the specific websites for which you accept cookies. Browsers on mobile devices generally offer fewer customization options than computers.

- if You are browsing the Internet with Internet Explorer, [follow the procedure here](#)
- if you are browsing the Internet with Mozilla Firefox, [follow the procedure here](#)
- if you are using Google Chrome, [follow the procedure indicated here](#)
- if you are browsing the Internet with Safari, [follow the procedure indicated here](#)

Note: If you make any changes, please note that they will not affect any cookies that may have been stored on your computer previously. You will need to delete them specifically.
